Café SPECIALTY A1, Feel the differences

## Evolving into the professional espresso machine

Café SPECIALTY A1 is not common coffee machine that you see everywhere. Café SPECIALTY A1 is used only high-end components such as Procon Pump, Brewer, Double Grinder that are applied to the best European HIGH-END coffee machine

### Powerful but Quiet Procon Pump

Low-noise design minimizes operating noise and supplies high-pressure hot water to maintain consistent and stable extraction pressure (9 bar) for a fast extraction rate of 22s (based on espresso) a cup of coffee as well as stable continuous sales

### Spindle Auto Brewer Mechanism

Automatic adjustment and extraction of up to 20g depending on the amount of coffee beans, producing rich crema and extracting espresso with optimal flavor and aroma through the double fine filter

### High-tech Steel Grinder

The high strength grinder enhances the durability of the knife and adjusts the level of grinding to enhance the unique taste of the beans

### Double Bean Hopper

It is a specialized cafe machine specification that can use two types of coffee beans, extracting Americano / Variation coffee menus perfectly and a double bean hopper can load up to 4.8kg. (2.4kg \*2ea)

### 6 Powder Canister Inside

It is possible to sell 36 different types of menus using Ade powder for cafes used in coffee shops and it minimizes the hassle of replenishing ingredients by installing 6 large capacity canisters. (1.5kg \*6ea)

### 23.6" Super Large FHD LCD Touch Screen

The high resolution FHD 23.6-inch LCD touch screen and intuitive UI make it easy and convenient for customers to order drinks and it provide s information such as resetting raw materials, sales, and out of stock out of stock through administrator mode for greater conveniiencece.

### 22 Sec. The Fastest Extraction Speed

When extracting coffee, it dramatically reduces the extraction time with the simultaneous operation system function, providing fast coffee service, which reduces waiting time and increases sales balance and sales due to low loss.

### Daily 150kg ICE Production

Available to make all drinks in a cool way in full day.

Café SPECIALTY A1
